Interest-free period	A maximum of 56 days for purchases made on your card if you pay your statement balance in full by the payment deadline. There is no interest-free period on cash transactions. Balance transfers are interest-free for the duration of the promotional period.
How interest will be charged	If you pay the balance shown on your current statement in full (excluding any balance transfers) by the payment deadline, we won't charge interest on purchases you made with your card. If you do not pay the balance shown on your current statement in full by the deadline, we will charge interest on

purchases from your statement day until you pay off your purchase balance.

If you make a cash (or “cash-like”) transaction, we will charge you interest from the day the transaction appears on your account until you pay off your cash balance.

We will not charge interest on your balance transfers during your promotional period. From the end of your balance transfer promotional period, we will charge interest on any unpaid balance transfers from your promotional period and future balance transfers at the standard interest rate we charge for balance transfers.

How we’ll allocate your payments

When you make a payment to us, we will apply it against whatever balance is charging you the higher rate of interest before those that are charged at lower rates of interest.

Minimum repayments

This is how we calculate your minimum payment.

Whatever value is higher out of:

- £5 or, if your outstanding balance is less than £5, your outstanding balance; or
- the sum of interest, fees, charges and arrears that have been applied to your account since your last statement date, plus a set percentage of the amount outstanding (see below for details).

The set percentage of the amount outstanding is the greater of:

- 1%; or
- your monthly simple interest rate + 0.1%

For example, an annual compound interest rate of 34.90% has a simple monthly interest rate of 2.526% so the set percentage of the amount outstanding would be 2.626%. Please note that the minimum payment of your card will vary if your interest rate changes.

If you only make the minimum payment each month, it will take you longer and cost you more to clear your balance.
